

ARAVINDHA NARAYANAN M

Chennai, Tamil Nadu

+91-9677053201 — aravindhnm9803@gmail.com — LinkedIn

Professional Summary

Software Engineer with 4+ years of experience developing and maintaining enterprise healthcare SaaS applications. Strong experience in JavaScript, HTML, CSS, REST APIs, frontend feature development, debugging, and backend services using Erlang. Proven ability to deliver scalable production-ready features, resolve critical production issues, and collaborate with cross-functional teams. Currently expanding expertise in TypeScript, React, Tailwind CSS, GraphQL, and AI-assisted development tools while pursuing modern frontend engineering practices.

Professional Experience

Software Engineer
MocDoc, Chennai

June 2021 – Present

- Developed and maintained 10+ enterprise healthcare SaaS modules using JavaScript, HTML, CSS, jQuery, and Erlang.
- Built reusable frontend components and implemented responsive UI enhancements for customer-facing applications.
- Designed and implemented 20+ REST APIs supporting new product functionality and system integrations.
- Resolved over 100 production issues across frontend and backend modules, improving stability and customer satisfaction.
- Delivered 15+ feature enhancements based on customer requirements and product roadmap.
- Collaborated with Product, QA, and Support teams to deliver frequent production releases.
- Optimized backend business logic and improved code reusability, reducing maintenance effort.
- Participated throughout the Software Development Life Cycle including requirement analysis, development, testing, deployment, and production support.

Graduate Engineering Trainee
Friends Metal Ltd, Chennai

Apr 2020 – Apr 2021

- Operated CNC machines while maintaining quality and production standards.
- Worked closely with supervisors to ensure engineering process compliance.

Technical Skills

Languages: JavaScript, Erlang, TypeScript (Learning)

Frontend: HTML5, CSS3, JavaScript, jQuery, React (Learning), Tailwind CSS (Learning)

Backend: Erlang, REST APIs

API Technologies: REST APIs, GraphQL (Learning)

Tools: Git, Visual Studio Code, Postman, GitHub Copilot, LLM-based IDEs

Database: SQL

Project Experience

Healthcare Product Development

- Developed enterprise healthcare management modules for hospitals and clinics.
- Implemented frontend enhancements using JavaScript, HTML, CSS, and jQuery.
- Built REST APIs supporting application workflows.
- Debugged production issues and optimized existing application functionality.
- Worked closely with QA and Product teams during feature releases.

Education

M.Tech in Data Science and Engineering	
BITS Pilani (WILP)	2023–2025
Bachelor of Engineering (Mechanical Engineering)	
Easwari Engineering College	2016–2020

Certification

Full Stack Web Development Certification – Corizo

Core Competencies

- Frontend Development
- JavaScript
- HTML5 & CSS3
- REST API Development
- Responsive UI Development
- Production Debugging
- Feature Development
- Git
- Agile Development
- Team Collaboration
- Problem Solving
